

COLONIAL SEAL COMPANY

Do you have an application that requires extensive effort to access a shaft for seal replacement?

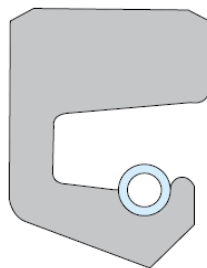

Do you have a situation where shaft and bore surfaces or alignment are not ideal?

If you have answered yes to either of these questions then our Non-Metallic or Fabric Reinforced Seals are your solution!

- Offers protection for a wide range of bearing types used in steel mills, paper / pulp mills, marine motors, windmills and heavy duty machinery.
- Reduce your maintenance costs and down time by using a split version that can be easily installed over any size shaft without disassembling the unit.
- Designed to maintain positive sealing even under Shaft-to-Bore Misalignment and Shaft Run-Out conditions.
- Two types are available in solid or split construction from the following materials: NBR, Viton®, Silicone and HNBR.

Fabric Reinforced Oil Seal w/Spring

Full Rubber Profile w/Spring

Your go to source for all your sealing solutions!

Benefits of Colonial Seal Company non-metallic seals ...

- **No Tooling Charges:** on standard split sizes. Low tooling charges may apply to solid profiles
- **Elastomeric Body:** allows for easy installation and prevents installation damage
- **All Rubber Construction:** provides positive sealing even under shaft misalignment and dynamic run-out conditions
- **Extensive Size Range:** from 0.25" shafts diameter upwards. Custom shaft sizes available upon request

FDA complaint compounds and Military Specs also available!!
