

Colonial Seal Company

Do you require custom made non-metallic seals???
Well, did you know ...

- We have the capabilities to supply lathe cut seals up to 60" in diameter
- We can supply most lathe cut seals within days, regardless of the material or profile
- We provide FDA compliant and [high performance sealing materials](#) such as PEEK, PEI and PTFE blends. These seals are used operating in bio-medical, food processing and chemical mixing equipment
- We have no minimum quantities and no tooling costs on our large diameter lathe cut seals
- We can supply these seals with energizer springs or metallic inserts

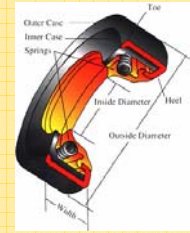

Call us at 800.564.2201 for a no obligation quote.
